***Supplemental***

***Notice to Applicant***

1. Please correct the spelling of the Examiner's name.

***Reasons for Allowance***

2. Claims 1-4, 6, 15-17 and 20-24 are Allowed.
3. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims invention of establishing a plurality of design rules for an electric circuit design that includes a first component for triggering usage, a second component for conditioning and a third component for implementation where such components are appropriately stored as datafiles and appropriately specified as source code, compiled into object code and bound together to form a rule object at runtime.

The closest prior art (Kucukacaker et al, USPN 5,907,698) teaches design tasks associated with architectural design rules that compare a mapping of the system to a set of rules which are indicative of an error free system. Kucukacaker does not teach rules composed of three separate components including a trigger component, a conditioning component and an implementation component each stored separately and combined as object code to form a rule object at run-time.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
